INDEX TO VOLUME LXIII

ACETONITRIL test for thyroid, 257.

Acidosis, production of, by anoxemia, 404.

Action currents in nerve, 417.

ADOLPH, E. F. The chemical regulation of the activities of the human kidney, 432.

Adrenal secretion, 405.

Adrenalin, attempts to alter vascular response to repeated injections of similar doses of, 83.

——, mechanism of sensitization to subcutaneous injections of, 88.

—— chloride, calorigenic action of, 407.

——, some effects of, on perfused bullfrog heart, 431.

——, vascular response to single intravenous injections of, 60.

——, vascular responses to repeated intravenous injections of equal doses of, 68.

Adrenals, relation of, to reflex volume changes in denervated limb, 436.

Adrenin, perfused, effect of muscular activity on, 404.

Alkalinity, salts and, resistance of fish to, 373.

ALLEE, W. C. The effect of potassium cyanide on metabolism in two fresh water arthropods, 499.

Anaphylactic reaction of uterus, site of, 427.

ANDERSEN, E. E. See WEYMOUTH, ANDERSEN and AVERILL, 410.

Ash of human sweat produced by heat and work, 350.

AVERILL, H. L. See WEYMOUTH, ANDERSEN and AVERILL, 410.

BACHMANN, G. The distribution of the vagus nerves to the sino-auricular junction of the mammalian heart, 300.

Bacteria, migration of, 428.

BALDWIN, F. M. Note on a method of making simultaneous fast and slow drum records of fatigue, 415.

BANTING, H. G., C. H. BEST, G. M. DOFFIN and J. A. GILCHRIST. Quantitative parallelism of effect of insulin in man, dog and rabbit, 391.

Basal metabolism of girls, 399.

BAUMBERGER, J. P. and J. M. D. OLMSTED. Increase in size at molting, 410.

BAZETT, H. C. Causation of the differential blood pressure in aortic regurgitation, 427.

—— and N. B. DREYER. Measurements of pulse wave velocity, 94.

BESSESEN, D. H. Changes in organ weights of the guinea pig during experimental scurvy, 245.

BEST, C. H. and J. J. R. MACLEOD. Some chemical reactions of insulin, 390.

——. See BANTING, BEST, DOFFIN and GILCHRIST, 391.

BISHOP, K. S. See EVANS and BISHOP, 396.

BLEILE, A. M. and R. J. SEYMOUR. The effect of formaldehyde upon the vitamin content of milk, 421.

Blood clotting, effect of absorbed fibrinogen on, 484.

—— concentration in experimental shock, 142.

—— elements in complement deficient guinea pigs, 412.

Blood gases, blood-volume and transport of, 1.
——, parathyroid tetany, effect of, on motor nerves, 535.
—— picture, effects of strychnine and physostigmine on, 392.
—— pressure, differential, cause of, in aortic regurgitation, 427.
—— ——, response of denervated limb to, 436.
—— sugar in rabbit, concentration of, 520.
—— —— of rabbit, diurnal variation in, 513.
——, volume-flow of, bloodless method of recording, 413.
—— volume methods, inadequacy of, 358.
—— ——, relation of, to tissue-nutrition, 1, 32.
Blumenstock, J. See Luckhardt and Blumenstock, 409.
Body temperature during operations, apparatus for regulating, 414.
Boothby, W. M. and I. Sandiford. The calorigenic action of adrenalin chloride, 407.
——. See Plummer and Boothby, 406.
Brooks, S. C. The electrolytic conductance of tissues as affected by the surrounding medium, 400.
Brunquist, E. H. See Koehler, Brunquist and Loevenhart, 404.
Burge, W. E. Proof that a high protein diet increases and starvation decreases the catalase content of the entire animal, 545.
——. The effect of gymnasium exercises and athletic contents on the blood catalase, 431.
——. The effect of food, starvation and low temperature on the catalase content of paramecia, 432.

Capp, C. S. See Gesell, Capp and Foote, 1.
——. See Gesell, Foote and Capp, 32.
Carbon dioxide, response of circulation and respiration to, 155.
Card, T. A. See Slonaker and Card, 503.
Cardiac size and output in man during rest and moderate exercise, 400.
Capillaries of skin, effect of contractions and of dermography on, 425.
Catalase content of animal body, effect of diet on, 545.
—— —— —— paramecia, effect of food, starvation and low temperature on, 432.
—— of blood, effect of athletic exercises on, 431.
Cerebral cortex of marsupial, effect of localized lesions on, 433.
Chemical effects produced by passing electric currents through thin artificial membranes of high electrical resistance, 415.
Circulation and respiration, response of, to CO_2, 155.
Circulatory changes in experimental dehydration, 394.
Citric acid, occurrence of, in sweat, 540.
Clowes, G. H. A. See Page and Clowes, 117.
Cohn, E. J. On the concentration of proteins in tissues, 430.
Collip, J. B. Delayed manifestation of the physiological effects of insulin following the administration of certain pancreatic extracts, 391.
Cooper, E. The distribution of the vitamin A in the urine and the digestive secretions (man, dog), 425.
Cytolysis and protoplasmic structure, 117.

Diet, effect of, on catalase content of animal body, 545.
——, restricted, effect of, on growth, 503.

Dietary factor, hitherto unknown, essential for reproduction, 396.
Doffin, G. M. See Banting, Best, Doffin and Gilchrist, 391.
Dorst, S. E. See Mills, Dorst, Mynchenberg and Nakayama, 484.
Downs, A. W. See Eddy and Downs, 479.
Dragstedt, L. R. The pathogenesis of parathyroid tetany, 408.
Dresbach, M. The silver non-polarizable electrode adapted for use in electrocardiography, 426.
Dreyer, N. B. See Bazett and Dreyer, 94.
Durrant, E. P. See Hoskins and Durrant, 404.

Eadie, G. S. The variations of the blood sugar of the rabbit throughout the day and the effect of the subcutaneous injection of glucose, 513.
Eddy, N. B. and A. W. Downs. Some unusual appearances of nucleated erythrocytes in the circulation following repeated injections of splenic extract, 479.
Edmunds, C. W. and P. C. Lloyd. Some effects of strychnine and physostigmine upon the blood picture, 392.
Electrocardiogram in fasting dogs, 422.
Electrode, silver non-polarizable, 426.
Epinephrin, effect of, on frog heart, 566.
Erlanger, J. See Gasser and Erlanger, 417.
Erythrocytes, rabbit, after splenic extract injection, 479.
Evans, H. M. and K. S. Bishop. On the existence of a hitherto unknown dietary factor essential for reproduction, 396.
Eyster, J. A. E. See Meek and Eyster, 400.

Fatigue, method of making fast and slow drum records of, 415.
——, studies in, 338.
——, tests for, 185.
Fever, vaccine, in rabbits rendered poikilothermic by cervical cord transection, 403.
Fibrinogen, rapid intestinal absorption of, 413, 418.
——, tissue, absorption and excretion of, 484.
Filtration through Berkefeld candles, factors affecting, 429.
—— —— frog-skin, 396.
Fish, resistance of, to salts and alkalinity, 373.
Forbes, A., F. R. Griffith and L. H. Ray. Delay in the response to the second of two stimuli in nerve and in the nerve-muscle preparation, 416.
Ford, T. H. See Scott and Ford, 520.
Foote, F. See Gesell, Capp and Foote, 1.
——. See Gesell, Foote and Capp, 32.

Gasser, H. S. and J. Erlanger. The components of the action currents obtained from nerves, 417.
Gastric secretion, excitation of, 418.
Gesell, R. A simplified automatic and bloodless method of recording the volume-flow of blood, 413.
——. The significance of the dual function of hemoglobin in relation to the mechanism of the chemical regulation of respiration, 393.
——, C. S. Capp and F. Foote. On the relation of blood-volume to tissue-nutrition. IV. The effects of hemorrhage and subsequent intravenous injection of gum-saline solution on the response of the anesthetized dog to the alternate administration of room air and of a mixture of carbon dioxide in room air, 1.

GESELL, R., F. FOOTE and C. S. CAPP. On the relation of blood-volume to tissue-nutrition. V. The effects of changes in blood-volume elicited by hemorrhage and the intravenous injection of gum-saline solution on the total oxygen consumption of the anesthetized dog, 32.
GIBBS, C. B. F. See SUTTER, GIBBS and MURLIN, 392.
GILCHRIST, J. A. See BANTING, BEST, DOFFIN and GILCHRIST, 391.
Glomerulus; condition of, during renal secretion, 368.
Glucose, effect of ingestion of, on blood sugar of rabbit, 520.
Goiter, exophthalmic, cost of work in, 406.
Graves' syndrome and involuntary nervous system, 60, 68, 83, 88.
GRIFFITH, F. R. See FORBES, GRIFFITH and RAY, 416.
Growth, effect of loss of thyroid and parathyroid glands on, 218.
——, —— —— restricted diet on, 503.
——, —— —— thyro-parathyroidectomy and parathyroidectomy on, 408.
—— in Lamellibranch, 412.
GRUBER, C. M. Studies in fatigue. XIII. The staircase phenomenon in mammalian skeletal muscle, 338.
GUENTHER, A. E. See LAWSON, MORGULIS and GUENTHER, 422.
Gum saline, effect of, on tissue nutrition, etc., 1, 32.

HAMMETT, F. S. Studies of the thyroid apparatus:
VIII. On the alleged exogenous source of the poisons giving rise to tetania parathyreopriva, 151.
IX. The effects of the loss of the thyroid and parathyroid glands at 100 days of age on the growth in body length, body weight and tail length of male and female albino rats, 218.
HAMMETT, F. S. The effect of thyro-parathyroidectomy and parathyroidectomy at 100 days of age on the growth of male albino rats, 408.
HARTMAN, C. Relation of the ovary to the gravid uterus in the aplacental opossum, 423.
HARTMAN, F. A. Some conditions determining adrenal secretion, 405.
Heart, beating, heat liberated by, 583.
——, distribution of vagus fibers in, 300.
——, frog, effect of epinephrin on, 566.
Hemoglobin, dual function of, in respiration, 393.
Hemorrhage followed by gum saline injections, 1, 32.
Heparin, an anticoagulant, 434.
HOSKINS, R. G. and E. P. DURRANT. Effect of muscular activity on perfused adrenin, 404.
HOWELL, W. H. Heparin, an anticoagulant, 434.
HUNT, R. The acetonitril test for thyroid and of some alterations of metabolism, 257.
HYMAN, H. T. See LIEB and HYMAN, 60, 68, 83, 88.

ILLENDEN, J. See PATTERSON, ILLENDEN, RUBRIGHT and SCOTT, 421.
Insulin, delayed manifestation of the physiological effects of, 391.
——, experiments on the mechanism of action of, 389.
——, quantitative parallelism of effect of, in man, dog and rabbit, 391.
——, some chemical reactions of, 390.
Intestinal absorption, pituitary extracts and, 146.
Intestine, small, reflex mechanism and segmental contractions in, 399.
IVY, A. C. and G. B. MCILVAIN. The excitation of gastric secretion by application of substances to the duodenal and jejunal mucosa, 418.

JACOBSON, C. The direst influence of the blood of parathyroid tetany animals on the excitability of the motor nerves, 535.

KAPSINOW, R. See UNDERHILL and KAPSINOW, 142.
KEETON, R. W. Vaccine fever in rabbits rendered poikilothermic by cervical cord transection, 403.
KEITH, N. M. Circulatory changes in experimental dehydration, 394.
Kidney, chemical regulation of activities of, 432.
—— secretion, condition of glomerulus during, 368.
KOCH, F. C. See LUCKHARDT, STANGL and KOCH, 397.
KOEHLER, A. E., E. H. BRUNQUIST and A. S. LOEVENHART. The production of acidosis by anoxemia, 404.
KRUSE, T. The respiratory exchange under ether narcosis, 398.
KUNDE, M. M. On the cause of the increase in basal metabolism during the initial days of fasting, 401.
KUNTZ, A. and J. E. THOMAS. On the local reflex mechanism and the nature of the segmental contractions in the small intestine, 399.

LACTIC acid, administration of, after removal of liver, 424.
LAMSON, P. D. and S. M. ROSENTHAL. The inadequacy of our present blood volume methods, 358.
LAWSON, H. C., S. MORGULIS and A. E. GUENTHER. The electrocardiogram in fasting dogs, 422.
Lead pallor, experimental, 395.
LEAKE, C. D. The occurrence of citric acid in sweat, 540.
LEE, F. S. and J. D. VANBUSKIRK. An examination of certain proposed tests for fatigue, 185.
LIDDELL, H. S. See SIMPSON and LIDDELL, 406.
LIEB, C. C. and H. T. HYMAN. Studies of Graves' syndrome and the involuntary nervous system:
IV. The vascular response of the pithed cat to single intravenous injections of adrenalin, 60.
V. The vascular responses of the pithed cat to repeated intravenous injections of equal doses of adrenalin, 68.
VI. Attempts to alter the vascular response of the pithed cat to repeated injections of similar doses of adrenalin, 83.
VII. On the mechanism of sensitization to subcutaneous injections of adrenalin, 88.
LILLIE, R. S. and S. E. POND. Chemical effects produced by passing electric currents through thin artificial membranes of high electrical resistance, 415.
LLOYD, P. C. See EDMUNDS and LLOYD, 392.
LOEVENHART, A. S. See KOEHLER, BRUNQUIST and LOEVENHART, 404.
LUCKHARDT, A. B. and J. BLUMENSTOCK. Additional observations on completely thyroparathyroidectomized dogs, 409.
——, F. STANGL and F. C. KOCH. Preliminary report on the daily amount, physical properties and rate of secretion of human pancreatic juice, 397.

MCCARTNEY, J. L. Studies on the mechanism of sterilization of the female by spermotoxin, 207.
MCCLELLAND, J. R. The influence of various stimuli upon human saliva, 127.
MCCORMICK, N. A., J. J. R. MACLEOD, K. O'BRIEN and E. C. NOBLE. Experiments on the mechanism of action of insulin, 389.
MCILVAIN, G. B. See IVY and MCILVAIN, 418.

McIver, M. A. An apparatus for regulating the body temperature of an animal during operative procedures, 414.

MacLeod, G. See Rose and MacLeod, 399.

Macleod, J. J. R. See Best and Macleod, 390.

——. See McCormick, Macleod, O'Brien and Noble, 389.
